That is what you are looking for here. This website is not only for a single day site, you can get them almost everywhere. Just visit the site, search what you want, and you will get it.

This chapter discusses the economics of teacher supply. As in broad terms, teacher supply means the number of people who, under certain conditions, would be willing to supply a given number of teaching hours at a given wage rate. The demand for teachers is affected by the prices they charge, and how much they charge, their specialty and the price of other goods and services. In other words, when teaching is a vocation, it needs to make money. The economic cycle and teacher supply. A paper commissioned by the education and training unit - Department of education, Royal Holloway, University of London and Centre for economic performance, London school at: The economics of an urban teacher supply (Problems with the supply of teachers continue to generate national concern.
