Large numbers of Hungarians found themselves in a new country as a minority after the Trianon Treaty in 1920 when Hungary lost two thirds of its land and one third of its population. Minorities in East and Central Europe have a long history and for the most part they used to live together peacefully however increasing national identity in the 19th century challenged the lives of minorities. Countries try to homogenize their population although some minorities had been living there for a couple of hundred years already. Hungarian Minorities in Slovakia - Angela Kuhnert - 2014-09-06

Seminar paper from the year 2011 in the subject Ethnology / Cultural Anthropology, grade: 2,0, Corvinus University Budapest, language: English, abstract: Large numbers of Hungarians found themselves in a new country as a minority after the Trianon Treaty in 1920 when Hungary lost two thirds of its land and one third of its population. Minorities in East and Central Europe have a long history and for the most part they used to live together peacefully however increasing national identity in the 19th century challenged the lives of minorities. Countries try to homogenize their population although some minorities had been living there for a couple of hundred years already. This essay examines particularly the ethnic Hungarians in Slovakia with a brief background on Hungarian-Slovak history, problems and improvements Hungarians have faced especially since the existence of the Slovak Republic as of 1993 and how Hungary seeks to support its people as a kin-state. Additionally a short insight on the other side is given, namely on how Slovaks think about the Hungarian minority and how the Slovak minority lives in Hungary.

**Hungarian Religion, Romanian Blood** - R. Chris

Amid the rising nationalism and racial politics that culminated in World War II, European countries wishing to "purify" their nations often forced unwanted populations to migrate. The targeted minorities had few options, but as R. Chris Davis shows, they sometimes used creative tactics to fight back, redefining their identities to serve their own interests. Davis's highly illuminating example is the case of the little-known Moldavian Csangos, a Hungarian- and Romanian-speaking community of Roman Catholics in eastern Romania. During World War II, some in the Romanian government wanted to expel them. The Hungarian government saw them as Hungarians and wanted to settle them on lands confiscated from other groups. Resisting deportation, the clergy of the Csangos enlisted Romania's leading racial anthropologist, collected blood samples, and rewrote a millennium of history to claim Romanian origins and national
the Hungarian government discrimination and violence that devastated so many of Europe's Jews, Roma, Slavs, and other minorities. In telling their story, Davis offers fresh insight to debates about ethnic allegiances, the roles of science and religion in shaping identity, and minority politics past and present.

&lt;I&gt;The Hungarian Minority of Transylvania gives an overview of the Hungarian minority's situation between the end of Communism and Romania's entry into the EU. In the historical foreword, the author sets the scenes while re-creating the dialectic relation between both nations. The author also provides a theoretical background on minority rights, with the goal to define to which minority sub-category belongs the Hungarian minority of Romania. The third section of the study reviews the minority rights legislation in force in Romania in 1990-2007 (international texts, bilateral treaties, Romanian legislation). The last chapter presents an overview of the situation in the field, using reports by international human rights organisations, local NGOs and civil rights organizations. The conclusion offers an analysis of the general situation of the Hungarian minority in Romania today.&lt;/I&gt;

Unequal Accommodation of Minority Rights - Tamás Kiss - 2018-05-31
This book provides an in-depth multidisciplinary analysis of the major social and political processes affecting Hungarians in Romania after the overthrow of the Communist regime in 1989. The volume highlights the interdependence between the ethno-political strategies of minority elites and Romania's minority policy regime on the one hand, and social processes such as ethnic stratification on the other. The chapters combine perspectives from a variety of disciplines including political science and the sociology of ethnic relations, supported by the findings of a broad array of empirical investigations carried out in Transylvania. It will therefore be of particular interest to scholars and students with a focus on minority politics, ethnic mobilization and nationalism, as well as researchers of ethnic relations, ethnic boundary making, social distances and ethnic inequalities.

Ethnic Minorities and Inter-ethnic Relations in Context: A Dutch-Hungarian Comparison - Karen Phalet - 2017-10-19
This volume is based on papers presented on ethnic minorities and inter-ethnic relations in Hungary and The Netherlands, which were presented and discussed in three conferences and a series of meetings from 1997-1999. This work builds on comparative studies of the
Hungarian Comparison - mobilization of anti-immigrant feelings. It presents cross-national comparative research, due to the credence that shifting national angles is a powerful strategic tool with which to correct national bias and to uncover submerged or overlooked aspects of specific national cases. The book brings together contributions from Hungarian and Dutch scholars in the field of ethnic minorities and inter-ethnic relations. The two countries are used as exemplary cases of distinct ethno-political patterns in Central and Western Europe. Combining complementary configurational and dimensional approaches to cross-national comparison, the diverse forms of ethnic relations in Hungary and The Netherlands are analyzed, and competing explanations of ethno-political conflict (or co-ordination) are tested in both national contexts.

National and Ethnic Minorities in Hungary, 1920-2001 - Agnes Toth - 2005

The disintegration of the Austro-Hungarian Monarchy led to the development of several nation-states. Hungary has been affected by this problem in two ways. On the one hand, the Trianon Peace Treaty ended the minority status of Hungarians in neighboring countries. On the other hand, due to territorial annexations, Hungary itself did not become a pure nation-state; instead, it became host to significant numbers of minorities. The essays in this book discuss the most important questions dealing with the history of national minorities in Hungary between 1920 and 2000. It is a history that is not separate from the history of society; yet, minority communities have their own stories and developmental trends which, in many cases, are unique.

Ethnic Bargaining introduces a theory of minority politics that blends comparative analysis and field research in the postcommunist countries of East Central Europe with insights from rational choice. Erin K. Jenne finds that claims by ethnic minorities have become more frequent since 1945 even though nation-states have been on the whole more responsive to groups than in earlier periods. Minorities that perceive an increase in their bargaining power will tend to radicalize their demands, she argues, from affirmative action to regional autonomy to secession, in an effort to
protection of minorities and concessions from the central government. The language of self-determination and minority rights originally adopted by the Great Powers to redraw boundaries after World War I was later used to facilitate the process of decolonization. Jenne believes that in the 1960s various ethnic minorities began to use the same discourse to pressure national governments into transfer payments and power-sharing arrangements. Violence against minorities was actually in some cases fueled by this politicization of ethnic difference. Jenne uses a rationalist theory of bargaining to examine the dynamics of ethnic cleavage in the cases of the Sudeten Germans in interwar Czechoslovakia; Slovaks and Moravians in postcommunist Czechoslovakia; the Hungarians in Romania, Slovakia, and Vojvodina; and the Albanians in Kosovo. Throughout, she challenges the conventional wisdom that partisan intervention is an effective mechanism for preventing or resolving internal conflict.
