First published in 1972, Handbook for History Teachers is intended to be a general and comprehensive work of reference for teachers of history in primary and secondary schools of all kinds. The book covers all aspects of teaching history: among them are the use of sources, world history, art and history; principles of constructing a syllabus and the psychological aspects of history teaching. The bibliographical sections are arranged on three parts: school textbooks, a section on audio-visual aids and, finally, books for the teacher and possibly for the sixth form. It thoroughly investigates and critiques the various methods employed in teaching history within classrooms and suggests alternatives wherever applicable. Diligently curated by the Standing Sub-Committee in History, University of London Institute of Education, the book still holds immense value in the understanding of pedagogy.

The coming of the Comet - Nick Robin - 2012-10-10
In August 1812 Henry Bell's revolutionary paddle steamer, that made her first journey on the Clyde, marked the start of extraordinary developments that completely transformed shipping and transport in Britain, Europe and the Americas. The paddle steamer soon became the key link with Empire, pushing the Honourable East India Company's wooden walls off the seas; it provided the all-important link with the Americas, and it offered emigrants to the New World a means of pushing westwards. In this fascinating new book Nick Robin analyses the remarkable impact of the paddle steamer and goes on to describe its development, both in terms of technology design and in relation to its effects on the transformation of nineteenth-century economies. He includes all Henry Bell's changes - the Burns brothers, Laird, Napier, Fulton, Symington Curaud and Denny to name a few, and offers emigrants to the New World a means of pushing westwards. from before 1066 up to the 1790s. It includes accounts of famous disasters such as the Mary Rose, Eurydice, Royal George, Gladiator and the Pacific Glory, plus the scuttling of the royal cutter Britannia. Sailing ships, paddle steamers, submarines and cargo vessels - they are all here.

Shipwrecks of the Wight - J. C. Medland - 1886

Presents a comprehensive illustrated history of ships of all types which have been wrecked on the shores of the Isle of Wight, or in the surrounding sea, over the period from before 1066 up to the 1790s. It includes accounts of famous disasters such as the Mary Rose, Eurydice, Royal George, Gladiator and the Pacific Glory, plus the scuttling of the royal cutter Britannia. Sailing ships, paddle steamers, submarines and cargo vessels - they are all here.

Across the Pond - Malcolm Archibald - 2001

Across the Pond tells of the changing use of this ocean, from a barrier to a route to riches and a highway for trade. Much is covered - exploration and exploitation; fighting and fishing; luxury cruises on the steamships of the Cunard and Collins lines and always the dangers of the sea. There also slipped the slavers with their cargo of shame. The story of the early aerial pioneers is recounted, there being many contenders for the first aircraft to fly across the Atlantic, such as the flying boats, known as the nancies. This is an ocean that bred some of the world's hardest mariners, famous men such as Cabot, Hudson and Vespucci but also the nameless thousands who manned the ships, the hard-used mariners from the Chesapeake, the Solway and Seville. Here was bred the down east Yankee, the Nova Scotian bluenose and the Scouser from Liverpool. Across the Pond tells some of their story.

Maritime History as Global History - Maria Fusaro - 2017-12-01

This study aims to provide new insights into the connections between maritime history and global history. It demonstrates the significance of maritime activity as a conduit of global exchange by examining local, national, and international interdependencies and trade networks, and a broad range of time periods, geographical areas, and various sub-divisions of maritime historical research. It is composed of ten essays, with an introductory chapter and concluding chapter. The first five essays discuss the effects globalisation on shipping in the early modern period; the following three discuss maritime transportation and the economics of industrialisation from the nineteenth century to the present day; the next discusses the impact of global entrepreneurialism on maritime history; the penultimate discusses the connections and variables between maritime and global history; and the concluding chapter examines the theoretical assumptions surrounding the two disciplines, using the globalisation of Early Modern Spain as a case study to do so. The study demonstrates that the core strength of maritime history is its essential place in global history, and that the process of globalisation began at sea.
