New Plants From Guatemala and Honduras (Classic Reprint) - S. F. Blake - 2018-03
Excerpt from New Plants From Guatemala and Honduras The present paper by Dr. S. F. Blake, of the Bureau of Plant Industry, United States Department of Agriculture, contains descriptions of forty-six new species of flowering plants from eastern Guatemala and Honduras. The collection of which these new species form a part was made during the spring of 1919 by several members of an Economic Survey Mission sent out by the United States Department of State, to which Prof. Henry Pittier, Dr. S. F. Blake, and Mr. G. B. Gilbert, of the Bureau of Plant Industry, were attached as botanists. A paper containing notes on the uses and native names of the plants collected on this expedition is in process of preparation.

**Guatemala-U.S. Migration** - Susanne Jonas - 2015-01-05

Guatemala-U.S. Migration: Transforming Regions is a pioneering, comprehensive, and multifaceted...
migrants, incorporating gendered as well as ethnic and class dimensions of migration. It spans the most violent years of the civil war and the postwar years in Guatemala, hence including both refugees and labor migrants. The demographic chapter delineates five phases of Guatemalan migration to the United States since the late 1970s, with immigrants experiencing both inclusion and exclusion very dramatically during the most recent phase, in the early twenty-first century. This book also features an innovative study of Guatemalan migrant rights organizing in the United States and transregionally in Guatemala/Central America and Mexico. The two contrasting in-depth case studies of Guatemalan communities in Houston and San Francisco elaborate in vibrant detail the everyday experiences and evolving stories of the immigrants’ lives.

**Religious Transformation in Maya Guatemala** - John P. Hawkins - 2021-05-01
Mayas, and indeed all Guatemalans, are currently experiencing the collapse of their way of life. This collapse is disrupting ideologies, symbols, life practices, and social structures that have undergirded their society for almost five hundred years, and it is causing rapid and massive religious transformation among the K'iche' Maya living in highland western Guatemala. Many Maya are converting to Christian Pentecostal faiths in which adherents and leaders become bodily agitated during worship. Drawing on over fifty years of research and data collected by field-school students, Hawkins argues that two factors—cultural collapse and systematic social and economic exclusion—explain the recent religious transformation of Maya Guatemala and the style and emotional intensity through which that transformation is expressed. Guatemala serves as a window on religious change around the world, and Hawkins examines the rapid pentecostalization of Christianity not only within Guatemala but also throughout the global South. The "pentecostal wail," as he describes it, is ultimately an acknowledgment of the angst and insecurity of contemporary Maya.
