However below, taking into account you visit this web page, it will be therefore definitely easy to get as well as download guide Negation and Clausal Structure: A Comparative Study of Romance Languages [eBooks] Negation And Clausal Structure A Comparative Study Of Romance Languages

This book presents a hypothesis-based description of the clausal structure of German Sign Language (DGS). The structure of the book is based on the three clausal layers CP, IP/TP, and VoiceP. The main hypothesis is that scopal height is a key factor in the shaping of the structural layer. The book presents a clear and up-to-date overview of the Minimalist Program, synthesizes the most important research findings, and explores the major shifts in generative syntax. It is based on the assumption that the structure of the clause is determined by the interaction of the lexical layer and the clausal layer, and that the structure of the clause is generated by a process of move and merge. The book is aimed at researchers in the field of theoretical and theoretically inclined descriptive linguistics who are interested in the structure of the clause. Each chapter is accompanied by a set of exercises that allow the reader to practice the concepts discussed in the text. The book is intended for advanced undergraduate and graduate students, as well as for researchers in the field of theoretical and theoretically inclined descriptive linguistics.
