What Will We Do If We Don't Experiment On Animals? - Jean Switzer Greek - 2004

Dr. Switzer wrote this book in an effort to demonstrate the need for the best way to conduct medical research and drug testing. During their lectures and debates, the most commonly asked question was, “Well, what will we use if we don't use animals?” What Will We Do If We Don't Experiment On Animals? Medical Research for the Twenty-first Century makes medical research out of the nineteenth and into the twenty-first century. The book clearly states that even one species cannot predict drug response for another and describes what research and testing methods should be used today instead. This book is aimed at researchers whose human biomedical research dollars should be spent if we are to have cures for cancer, AIDS, and Alzheimer's. This book will appeal to science-trained and general audiences, animal lovers and science readers, public policy analysts, students, patients and patient support groups, and government watchdogs.
