Fisher has assembled a collection of seminal case studies that illustrate interactive approaches to conflict resolution from the Malaysia-Indonesia conflict in the 1960s to the Peru-Equador peace process of the late 1990s.

This edited volume presents selected papers focusing on Ronald Fisher’s cumulative contributions to understanding destructive intergroup conflicts from a social-psychological perspective, and to the development and assessment of small group, interactive methods for resolving them. Highlights include schematic models of third party consultations, intergroup conflicts, and a contingency approach to third party intervention. Overall, the selected texts offer a comprehensive description and clear rationale for interactive conflict resolution and its unique contributions to peacemaking.

**Interactive Conflict Resolution** - Ronald J. Fisher - 1997-06-01
This book examines the technique of interactive conflict resolution for peacebuilding: impartial third parties--through facilitated dialogue and focused analysis--brings together unofficial representatives of groups or nations engaged in protracted, violent conflict. The author discusses the works of major theorists as they have applied this technique to situations in Israel-Palestine, Northern Ireland, India-Pakistan, and Cyprus, among others. He describes various methods, including intercommunal dialogue, interactive problem solving, third party consultation, and the psychodynamic approach. This book also explores how the technique can be used in conjunction with official diplomacy and other methods of third party negotiations, including mediation and pre-negotiations. The author also addresses the critical areas which threaten the field, such as funding and institutionalization, and pinpoints the major challenges in years ahead--Back cover.
The end of the Cold War has changed the shape of organized violence in the world and the ways in which governments and others try to set its limits. Even the concept of international conflict is broadening to include ethnic conflicts and other kinds of violence within national borders that may affect international peace and security. What is not yet clear is whether or how these changes alter the way actors on the world scene should deal with conflict: Do the old methods still work? Are there new tools that could work better? How do old and new methods relate to each other? International Conflict Resolution After the Cold War critically examines evidence on the effectiveness of a dozen approaches to managing or resolving conflict in the world to develop insights for conflict resolution practitioners. It considers recent applications of familiar conflict management strategies, such as the use of threats of force, economic sanctions, and negotiation. It presents the first systematic assessments of the usefulness of some less familiar approaches to conflict resolution, including truth commissions, "engineered" electoral systems, autonomy arrangements, and regional organizations. It also opens up analysis of emerging issues, such as the dilemmas facing humanitarian organizations in complex emergencies. This book offers numerous practical insights and raises key questions for research on conflict resolution in a transforming world system.

**Constructive Conflicts** - Louis Kriesberg - 2007

A fourth edition of this textbook is now available. This popular, highly regarded, and comprehensive book synthesizes pertinent theories and evidence about diverse conflicts. Kriesberg examines the strategies that partisans and intermediaries can use to minimize the destructiveness of these conflicts. Not only does he examine large-scale forces that affect the various stages of conflict, but also the elements that contribute to constructive transformations at each stage. The diverse conflicts discussed are; the American civil rights struggle, the struggle for women's rights, apartheid in South Africa, labor-management relations, Palestinian-Israeli relations, protecting the environment, the Cold War, and countering terrorism, as well as conflicts in Northern Ireland, Chiapas, Mexico,

Resolving Deep-Rooted Conflicts - Herbert C. Kelman - 2016-07-15
This book is a collection of articles and essays by Professor Herbert C. Kelman, a leading figure in the conflict resolution community and one of the most influential peace researchers. Professor Kelman, a social psychologist, has been a pioneer of conflict resolution and peace research, and his work in conflict resolution has included a decades-long action research program on the Arab-Israeli conflict which has seen the development of Interactive Problem-Solving Workshops, an approach which has had a deep impact not only on research, but also on the practice of conflict resolution around the world, and especially in the Middle East. Focusing on Kelman’s conflict resolution-related work, this volume comprises an important collection of articles written by Kelman across his career as academic and practitioner. By bringing together these carefully selected articles the book offers a concise overview of the body of Kelman’s work and his intellectual biography. This book provides a vivid reader on experiences of mediation throughout history and in many different regional, cultural and legal contexts. For experts in the field of mediation and legal anthropology it provides a series of fascinating case studies not previously reported on. For those not familiar with the field it provides a window on an alternative possibility for peacemaking in political conflicts. The book is held together by the editor's introduction, which methodologies employed, the relationship of mediation to participatory democracy, and the growth of mediation in the past twenty years. The chapters which follow provide the anatomy of successful and unsuccessful mediations in contexts as widely diverse as the 30 Years War (1618-1648) which was ended following the intercession of the future Pope, Alexander VII. Three further chapters examine the role of the Catholic Church in other mediations - in the Basque conflict, in Burundi and in Chiapas, while a further group of chapters looks at conflicts in Ethiopia, Northern Ireland, Central America and Congo.

Conflict Resolution and Human Needs - Kevin Avruch - 2013-05-02
This edited volume examines Basic Human Needs theory and interactive problem solving, looking at recent developments in thinking about both and how these might affect peacebuilding in contemporary conflicts of the twenty-first century. The era in the immediate aftermath of World War II was, paradoxically, a time of great optimism in parts of academia. There was, especially in the United States and much of Europe, a widespread belief in the social sciences that systematic scholarly analysis would enable humanity to understand and do something about the most complex of social processes, and thus about solving persistent human problems: unemployment, delinquency, racism, underdevelopment, and even issues of conflict, war and peace. This book examines the evolution of the Basic Human Needs theory and is divided into two key parts: Basic Human Needs in Theory and Basic Human Needs in Practice. Exploring this theory through a wide range of different lenses, including gender, ethics and power, the volume brings together some of the leading scholars in the field of peace and conflict studies and draws upon research both past and present to forecast where the movement is headed in the future. This book will be of much interest to students of peace and conflict studies, conflict resolution,

The Oxford Handbook of Political Psychology - Leonie Huddy - 2013-08-01
Political psychology applies what is known about human psychology to the study of politics. It examines how people reach political decisions on topics such as voting, party identification, and political attitudes as well as how leaders mediate political conflicts and make foreign policy decisions. The Oxford Handbook of Political Psychology gathers together a distinguished group of scholars from around the world to shed light on these vital questions. Focusing first on political psychology at the individual level (attitudes, values, decision-making, ideology, personality) and then moving to the collective violence), this fully interdisciplinary volume covers models of the mass public and political elites and addresses both domestic issues and foreign policy. Now with new material providing an up-to-date account of cutting-edge research within both psychology and political science, this is an essential reference for scholars and students interested in the intersection of the two fields.

Conflict has its unique context and characteristics, the socio-psychological foundations and dynamics are similar. It offers a holistic and comprehensive outlook on the dynamics that characterize each stage and aspect of intractable conflicts. Each chapter systematically elucidates a particular part of the cycle, describing the theoretical frameworks and concepts, as well as presenting empirical data that was accumulated. The volume is an important contribution for all those who study intergroup conflicts and want to understand their dynamics. In addition, the book will interest the many people attempting to settle conflicts peacefully and who need knowledge about the socio-psychological vectors that influence their course and resolution.

development of Interactive Problem-Solving Workshops, an approach which has had a deep impact not only on research, but also on the practice of conflict resolution around the world, and especially in the Middle East. Focusing on Kelman's conflict resolution-related work, this volume comprises an important collection of articles written by Kelman across his career as academic and practitioner. By bringing together these carefully selected articles the book offers a concise overview of the body of Kelman's work and his intellectual biography. It traces the origins of the field of conflict resolution, the development of the study and practice of Interactive Problem Solving Workshops, and the wider challenges faced by conflict resolution research and practice. This book will be of much interest to students of peace and conflict studies, conflict resolution, psychology and IR in general.

**Theory and Practice of Conflict Resolution and Interactive Problem-Solving** - Herbert C. Kelman - 2016-07-20

This book is a collection of articles and essays by Professor Herbert C. Kelman, a leading figure in the conflict resolution community and one of the most influential peace researchers. Professor Kelman, a social psychologist, has been a pioneer of conflict resolution and peace research, and his work in conflict resolution has included a decades-long action research program on the Arab-Israeli conflict which has seen the

as assess the audience and the methodologies for peacebuilding. Outside parties learn how to facilitate cooperation by engaging local leaders in intensive, interactive workshops. These opposing leaders reside in small, ethnically divided countries, including Burundi, Cyprus, Estonia, Guyana, Sri Lanka, and Tajikistan, that have experienced communal conflicts in recent years. In Estonia and Guyana, peacebuilding initiatives sought to ward off violence. In Burundi and Sri Lanka, initiatives focused on ending ongoing hostilities, and in Cyprus and Tajikistan, these efforts brought peace to the country after its violence had ended. The contributors follow a systematic assessment framework, including a common set of questions for interviewing participants to prepare comparable results from a set of diverse cases. Their findings weigh the successes and failures of this particular approach to conflict resolution and draw conclusions about the conditions under which such interactive approaches work, as well used. This work features research conducted in conjunction with the Working Group on Preventing and Rebuilding Failed States, convened by the Wilson Center's Project on Leadership and Building State Capacity.

Global Conflict Resolution Through Positioning Analysis - Fathali M. Moghaddam - 2007-11-15
Readers find here a volume that applies positioning theory in order to achieve a fuller and more in-depth understanding of conflict and its psychological resolution. Positioning theory is the study of the nature, formation, influence and ways of change of local systems of rights and duties as shared assumptions about them influence small scale interactions. This book will thus be of interest to social psychologists and anyone interested in the development and applications of positioning theory.

Post-Conflict Peacebuilding - Vincent Chetail - 2009-03-26
Post-Conflict Peacebuilding comes at a critical time for post-conflict peacebuilding. Its rapid move towards the top of the international political agenda has been accompanied by added scrutiny, as the international community seeks to meet the multi-dimensional challenges of building a just and sustainable peace in societies ravaged by war. Beyond the strictly operational
perspectives the lexicon sheds light on many concepts and terminology used to discuss post-conflict peacebuilding. This ambiguity undermines efforts to agree on common understandings of how peace can be most effectively 'built', thereby impeding swift, coherent action. Accordingly, this lexicon aims to clarify and illuminate the multiple facets of post-conflict peacebuilding, by presenting its major themes and trends from an analytical perspective. To this end, the book opens with a general introduction on the concept of post-conflict peacebuilding, followed by twenty-six essays on its key elements (including capacity-building, conflict transformation, reconciliation, recovery, rule of law, security sector reform, and transitional justice). Written by international experts from a range of disciplines, including political science and international relations, international law, economics, and sociology, these essays cover the whole spectrum of post-conflict peacebuilding. In reflecting a diversity of different challenges associated with post-conflict peacebuilding. For each key concept a generic definition is proposed, which is then expanded through discussion of three main areas: the meaning and origin of the concept; its content and essential components; and its means of implementation, including lessons learned from past practice.

**Resolving Structural Conflicts** - Richard E. Rubenstein - 2017-01-06
This book analyses how certain types of social systems generate violent conflict and discusses how these systems can be transformed in order to create the conditions for positive peace. Resolving Structural Conflicts addresses a key issue in the field of conflict studies: what to do about violent conflicts that are not the results of misunderstanding, prejudice, or malice, but the products of a social system that generates violent conflict as part of its normal operations. This question poses enormous challenges to those interested in conflict resolution, since the solution to this problem involves restructuring social, political, and cultural systems rather than
systems generate violent conflict and discusses an agreement. This study breaks new ground in showing how local conflicts involving crime, police, and prisons; transnational conflicts involving religious terrorism by groups like ISIS; and international conflicts involving Great Power clashes are all produced in large part by elite-driven, exploitative or oppressive social structures. It also presents new ideas about the implications of this ‘structural turn’ for the practice of conflict resolution, emphasizing the need for conflict resolvers to embrace a new politics and to broaden their methods far beyond traditional forms of facilitation. Written by a leading scholar, this book will be of much interest to students of conflict resolution, peace studies, war and conflict studies, sociology, political science and international relations in general.

**Handbook of Conflict Analysis and Resolution** - Dennis J.D. Sandole - 2008-07-31
This major Handbook comprises cutting-edge essays from leading scholars in the field of Conflict Analysis and Resolution (CAR). The volume provides a comprehensive overview of the core concepts, theories, approaches, processes, and intervention designs in the field. The central theme is the value of multidisciplinary approaches to the analysis and resolution of conflicts. This consists of moving from the study of analytical approaches to third-party intervention approaches to preventing or ending violence, and to resolving and transforming conflict. The book is divided into four main parts: Part I: Core Concepts and Theories Part II: Core Approaches Part III: Core Practices Part IV: Alternative Voices and Complex Intervention Designs The Handbook of Conflict Analysis and Resolution is a benchmark publication with major importance both for current research and for the future of the field. It will be essential reading for all students of conflict resolution, peace and conflict studies, and International Relations in general, as well as to practitioners in the field.
This groundbreaking volume documents a comprehensive peacebuilding initiative in addressing the Israeli-Palestinian conflict and reviews the broad theoretical base underlying these efforts. Theory chapters discuss intrinsic peace-related concepts, including the nature of conflict, elements of individual and group identity, the long-term psychological effects of prolonged political hostilities, and the mechanisms of reconciliation and inclusiveness. Central to the coverage is the ambitious Building Peace through Knowledge Project, a four-year multidisciplinary program featuring a diverse palette of professional and community interventions to reduce the occurrence and trauma of political violence. The author reveals powerful insights connecting knowledge to peacebuilding by analyzing: · The relationships between attitudes and ideology in intergroup conflict. · The psychosocial impact of political violence among Israelis and Palestinians. · The literature on people-to-people interventions

Unlocking the Palestinian-Israeli Negotiations - Abdulsalam Muala - 2019-08-28
This book offers a critical review of contemporary literature on the Palestinian-Israeli negotiations. Its goal is to highlight the shortcomings of the methods that have been used to date to analyse the underlying causes that have led to a stalemate in the negotiation process. Further, it pursues an approach that considers the multiple factors that can influence the outcomes of the negotiation process. The book represents a substantial academic contribution to the field of conflict resolution by broadening the scope of the analytical framework that is needed to analyse the Palestinian-Israeli negotiations, and bridging the gap between

**Contemporary Conflict Resolution** - Oliver Ramsbotham - 2011-04-11
Since the end of the Cold War, conflict prevention and resolution, peacekeeping and peacebuilding have risen to the top of the international agenda. The third edition of this hugely popular text explains the key concepts, charts the development of the field, evaluates successes and failures, and assesses the main current challenges and debates in the second decade of the twenty-first century. Existing material has been thoroughly updated and seven new chapters added, on conflict resolution in a changing international order; environmental and popular culture; conflict resolution, the media and the communications revolution; managing radical disagreement in intractable conflict; theories and critiques of the field; and upcoming challenges and tasks for the next generation. The authors argue that a new form of cosmopolitan conflict resolution is emerging, which offers a hopeful means for human societies to handle their conflicts non-violently and eventually to transcend and celebrate their differences. Part I offers a comprehensive survey of the theory and practice of conflict resolution. Part II sets the field within the context of rapid global change and addresses the controversies that have surrounded conflict resolution as it has entered the mainstream. Contemporary Conflict Resolution is essential reading for students of peace and security studies, conflict management and international politics, as well as for those working in non-governmental organizations and think-tanks.

**Social Conflict within and between Groups** - Carsten K. W. De Dreu - 2014-05-09
Intergroup competition and conflict create pervasive problems in human society, giving rise to such phenomena as prejudice, terrorism, ethnic cleansing, and interstate war. Citizens, policy makers, social workers, schoolteachers, and politicians wrestle with these problems, and
consequences of social conflict. It will be of great causes conflict to escalate? How should we manage conflict within communities, and also in society at large? Is conflict always bad, or does it have other more beneficial consequences? Social Conflict within and between Groups provides an overview of contemporary research from the social sciences on these questions. It brings together the research output of a number of leading researchers in psychology, management and economics, sociology and political science, and draws on the outcomes of ten prominent research programs conducted over the past five years. The chapters cover a range of fascinating topics, including prejudice and discrimination in multi-ethnic societies, and conflict and negotiation in the field of industrial relations. The authors also consider the possibilities for intervention at the interpersonal, intergroup and societal level. This is the first volume to provide an interdisciplinary overview of the various scientific approaches to studying the origins and interest to researchers, graduates and upper-level undergraduate students from across the social and behavioural sciences.

Conflict Resolution Beyond the Realist 
Paradigm - Philip Gamaghelyan - 2017-09-26 
Conflict Resolution holds the promise of freeing 
approaches and policies with regard to politics of 
identity from the fatalistic grip of realism. While 
the conceptual literature on identity and conflicts 
resolution practice continues to rely on realist 
frames and acts as an unwanted auxiliary to

He builds on the work of postmodernist scholars, on reflective practice, and on discourse analysis to explore alternative and inclusive strategies with a transformative potential. The IR discipline that has dominated policymaking is only one possible lens, and often a deficient one, for defining, preventing, or resolving contemporary conflicts wrapped in identity politics. Other conceptual frameworks can help to rethink our understanding of identity and conflicts and reconstruct them as performative and not static phenomena. These transformative frameworks are increasingly influential in the conflict resolution field and can be applied to policymaking.
