Exploring Self and Society - Rosamund Billington - 1998-06-24

This text addresses contemporary society in an immediate and thought-provoking manner and will be a timely and topical introduction to the dynamic and critical dimensions of sociology. It adopts a broad social science approach which reflects both the authors' competencies and also the widening and overlaying boundaries of the social sciences. Starting with the problem-oriented agenda of the social sciences, it explores the tensions between structure, agency and process via the idea of a structure-bound and yet creative and participatory self.

The Self and Society in Aging Processes - Carol D. Ryff, PhD - 1999-06-23

This volume focuses on the experience of growing old as it is linked to societal factors. Ryff and Marshall construct this "macro" view of aging in society by bridging disciplines and bringing together contributors from all the social sciences. The book is organized into three sections: theoretical perspectives, socioeconomic structures, and contexts of self and society. Leading psychologists, anthropologists,

theoretical and empirical advances that forge links between the individual and the social aspects of aging. It is must reading for researchers in all gerontologic specialties, and a valuable text for graduate courses in human development, psychology of aging, and other social aspects of aging.

Work, Self and Society - Catherine Casey - 2013-01-11

Despite recent interest in the effects of restructuring and redesigning the work place, the link between individual identity and structural change has usually been asserted rather than demonstrated. Through an extensive review of data from field work in a multi-national corporation Catherine Casey changes this. She knows that changes currently occurring in the world of work are part of the vast social and cultural changes that are challenging the assumptions of modern industrialism. These events affect what people do everyday, and they are altering relations among ourselves and with the physical world. This valuable book is not only a critical analysis of the transformations occurring in the world of work, but an exploration of the effects of contemporary practices of work on the self.

Body, Self, and Society - Anne E. Becker - 2013-11-25

Anne E. Becker examines the cultural context of the embodied self through her ethnography of

of qualitative research. It presents existing relationships in Fiji. She contrasts the cultivation of the body/self in Fijian and American society, arguing that the motivation of Americans to work on their bodies' shapes as a personal endeavor is permitted by their notion that the self is individuated and autonomous. On the other hand, because Fijians concern themselves with the cultivation of social relationships largely expressed through nurturing and food exchange, there is a vested interest in cultivating others' bodies rather than one's own.

Exploring Communication through Qualitative Research - Monica Bîră - 2018-04-18

This volume offers an insight into contemporary communication studies, as seen through the lens

studies on qualitative research, current research programs, and trends for future expansion of this methodological approach. It also offers a series of practical examples of applying methods and techniques of qualitative research, to teach readers about the social world and to answer pressing problems related to applied communication. In terms of research, the studies within the book use focus-group interviews, in-depth interviews, qualitative content analyses, critical discourse analyses, and dispositif analyses. The volume covers areas such as education, public relations, advertising, strategic communication, heritage and museum management and intercultural dialogue. It will be a useful aid for students of qualitative research in the social sciences and humanities, but also for professionals in the field of communication.

Family, Self, and Society - Philip A. Cowan - 2014-05-22

Any agenda for family research in the 1990s must take seriously a contextual approach to the study of family relationships. The editors and contributors to this volume believe that the richness in family studies over the next decade will come from considering the diversity of family forms -- different ethnic groups and cultures, different stages of family life, as well as different

feelings of loneliness. Both traditions are explicit how we think about families in order to study them and understand them. To illustrate the need for diversity in family studies, examples are presented from new and old families, majority and minority families, American and Japanese families, and intact and divorcing families. This variety is intended to push the limits of current thinking, not only for researchers but also for all who are struggling to live with and work with families in a time when family life is valued but fragmented and relatively unsupported by society's institutions. Students and researchers interested in family development from the viewpoint of any of the social sciences will find this book of value.

Social Isolation in Modern Society - Roelof Hortulanus - 2006-06-28

Social isolation has serious repercussions for people and communities across the globe, yet knowledge about this phenomenon has remained rather limited - until now. The first multidisciplinary study to explore this issue, *Social Isolation in Modern Society* integrates relevant research traditions in the social sciences and brings together sociological theories of social networks and psychological theories of

embedded in research, with the results of a large-scale international study being used to describe the extent, nature and divergent manifestations of social isolation. With a new approach to social inequality, this empirically based study includes concrete policy recommendations, and presents a clear insight into personal, social and socio-economic causes and the consequences of social isolation.

Soul, Self, and Society - Edward L. Rubin - 2014-10-09

Morality is not declining in the modern world. Instead, a new morality is replacing the previous one. Centered on individual self-fulfillment, and linked to administrative government, it permits things the old morality forbid, like sex for pleasure, but forbids things the old morality allowed, like intolerance and inequality of opportunity.

- 2013-04-30

This major study develops a new account of modernity and its relation to the self. Building upon the ideas set out in *The Consequences of Modernity*, Giddens argues that 'high' or 'late' modernity is a post traditional order characterised by a developed institutional reflexivity. In the current period, the globalising tendencies of modern institutions are accompanied by a transformation of day-to-day social life having profound implications for personal activities. The self becomes a 'reflexive project', sustained through a revisable narrative of self identity. The reflexive project of the self, the author seeks to show, is a form of control or mastery which parallels the overall orientation of modern institutions towards 'colonising the future'. Yet it also helps promote tendencies which place that orientation radically in question - and which provide the substance of a new political agenda for late modernity. In this book Giddens concerns himself with themes he has often been accused of unduly neglecting, including especially the psychology of self and self-identity. The volumes are a decisive step in the development of his thinking, and will be essential reading for students and professionals in the areas of social and political theory, sociology, human geography and social psychology.

Self and Society - Drew Westen - 1985-10-31

The relation between individual and collective processes is central to the social sciences, yet difficult to conceptualize because of the necessity of crossing disciplinary boundaries. The result is that researchers in different disciplines construct their own implicit, and often unsatisfactory, models of either individual or collective phenomena, which in turn influence their theoretical and empirical work. In this book, Drew Westen attempts to cross these boundaries, proposing an interdisciplinary approach to personality, to culture, and to the relation between the two. Part I of the book sets forth a model of personality that integrates psychodynamic analysis with an understanding of cognitively mediated conditioning and social learning. In Part II, Westen offers a view of culture that blends symbolic and materialist modes of discourse, examining the role of both ideals and 'material' needs in motivating symbolic as well as concrete social structural processes. In Part III, he combines these models of personality and culture through an examination of cultural evolution and stasis, identity and historical change, and the impact of technological development on personality. Throughout the book, Westen provides reviews of the state of the art in a variety of fields, including personality theory, moral development, ego development, and culture theory. He also addresses and recasts central issues in psychology, sociology, anthropology, and social theory, such as the relations between emotion and cognition; social learning and psychodynamics; ideals and material forces; and individual and collective action. His book will appeal to students and scholars in all the social sciences, as well as to any reader concerned with understanding the relation between individuals and the world in which they live.

Race and Society - Tina Patel - 2016-11-08
Race and Society is a thoughtful and critically engaging exploration of some of the key issues around race and racialisation, which have arisen in what is considered to be a highly diverse and complex society. With a progressive approach emphasising the social construction of race issues within a post-racial era, moving away from essentialist and polarized explanations of raced interaction, Tina Patel: Introduces the main concepts and key theories, including their post-developments. Focuses on the processes and impact of racial categorisation in contemporary society. Highlights the intersectional and multifaceted nature of race and related

Exploring the Dynamics of Human

Development - Catherine Raeff - 2016-07-08

Researchers and students in developmental psychology have pointed out that the numerous findings from research about human development seem disconnected and that it is difficult to fit fragmented bits of information together. Studies of separate domains of functioning (e.g., cognition, emotion, language, social relationships, identity) divide the field and there are increasing calls for integrative conceptions of human development. In *Exploring the Dynamics of Human Development*, Dr. Catherine Raeff constructs a theoretical framework that enables readers to reconcile seemingly disparate information by thinking systematically about dynamic developmental processes. This approach integrates systems theory, organismic-developmental theory, and sociocultural theory, as well as research across cultures and the life span. Raeff brings developmental processes into coherence by building a unified theoretical framework that is organized around the following questions: What develops during development?; What happens during development?; and How does development happen? Using a wide range of illustrative empirical examples, Raeff conceptualizes what happens during development in terms of differentiation and integration and explains how development happens through individual, social, and cultural processes. The framework helps to overcome confusion in the field and explore issues such as individual and cultural variability, looking beyond age-based changes to understand development, and resolving fragmentation by starting with whole person functioning. The framework also opens up new directions for research. This book will be useful to developmentalists, graduate students, upper level undergraduates, and others who seek an integrative understanding of the field as a whole and a systematic way of thinking about and investigating human action and development.

The Girl at the Baggage Claim - Gish Jen -

A provocative and important study of the different ideas Easterners and Westerners have about the self and society and what this means for current debates in art, education, geopolitics, and business. Never have East and West come as close as they are today, yet we are still baffled by one another. Is our mantra "To thine own self be true"? Or do we believe we belong to something larger than ourselves--a family, a religion, a troop--that claims our first allegiance? Gish Jen--drawing on a treasure trove of stories and personal anecdotes, as well as cutting-edge research in cultural psychology--reveals how this difference shapes what we perceive and remember, what we say and do and make--how it shapes everything from our ideas about copying and talking in class to the difference between Apple and Alibaba. As engaging as it is illuminating, this is a book that stands to profoundly enrich our understanding of ourselves and of our world.

In this brief edition of *Sociology: Exploring the Architecture of Everyday Life*, David Newman shows students how to see the "unfamiliar in the familiar"—to step back and see predictability in their personal experiences. Through his approachable writing style and lively personal anecdotes, the author stays true to his goal of writing a textbook that "reads like a real book." Newman uses the metaphors of "architecture" and "construction," to illustrate that society is a human creation that is planned, maintained, and altered by individuals. In the Seventh Edition of this bestseller, students can use the most updated statistical information combined with contemporary examples to explore the individual and society, the construction of self and society, and social inequality in the context of social structures.

Society in the Self - Hubert J. M. Hermans - 2018-03-09

Instead of considering society as a social environment, *Society in the Self* begins from the assumption that society works in the deepest regions of self and identity, as expressed in phenomena like self-sabotage, self-radicalization, self-cure, self-government, self-nationalization, and self-internationalization. This leads to the central thesis that a democratic society can only function properly if it is populated by participants with a democratically organized self. In this book, an integrative model is presented that is inspired by three versions of democracy: cosmopolitan, deliberative, and agonistic democracy, with the latter focusing on the role of social power and emotions. Drawing on these democratic views, three levels of inclusiveness are distinguished in the self: personal (I as an individual), social (I as a member of a group), and global (I as a human being). A democratic self requires the flexibility of moving up and down across these levels of inclusiveness and has to

and the other, and between dialogue and social power. As author Hubert Hermans explains, this theory has far reaching consequences for such divergent topics as leadership in the self, cultural diversity in the self, the relationship between reason and emotion, self-empathy, cooperation and competition between self-parts, and the role of social power in prejudice, enemy image construction, and scapegoating. The central message of this book is reflected in Mahatma Gandhi's dictum: "Be the change you want to see in the world."

Transnational Popular Psychology and the Global Self-Help Industry - Daniel Nehring - 2016-04-08

Self-help books aim to empower their readers

from distinguished experts in the field discusses do they really live up to this? This book offers a fresh perspective on self-help culture and popular psychology. Research on this subject matter has generally focused on the USA and the Global Northwest. In contrast, this book explores the production, circulation and consumption of self-help books from an innovative transnational perspective. Case studies on Trinidad, Mexico, the People's Republic of China, the UK and the USA explore the roles which self-help's therapeutic narratives of self and social relationships play in the contemporary world. In this context, the book questions the extent to which self-help fulfils its promise of individual autonomy and contentment. At the same time, it addresses debates about contemporary political change under transnational processes of cultural standardization.

Self-Injury, Medicine and Society - Amy Chandler - 2016-09-23

This book provides an appreciative, sociological engagement with accounts of the embodied practice of self-injury. It shows that in order to understand self-injury, it is necessary to engage with widely circulating narratives about the nature of bodies, including that they are separate from, yet containers of 'emotion'. Using a sociological approach, the book examines what self-injury is, how it functions, and why someone might engage in it. It pays close attention to the corporeal aspects of self-injury, attending to the complex ways in which 'lived experience' is narrated. By interrogating the way in which healthcare and psychiatric systems shape our understanding of self-injury, *Self-Injury, Medicine and Society* aims to re-invigorate traditional discourse on the subject. Combining analytical theory with real-life accounts, this book provides an engaging study which is both thought-provoking and informative. It will appeal to an interdisciplinary readership and scholars in the fields of medical sociology and health studies in particular.

Sociology - David M. Newman - 2020-01-08

In *Sociology: Exploring the Architecture of Everyday Life*, David Newman shows students how to see the "unfamiliar in the familiar"—to step back and see organization and predictability in their personal experiences. Through his approachable writing style and lively personal anecdotes, the author has maintained his goal from the first edition: to write a textbook that "reads like a real book." Many adopters of this book are fans of Peter Berger's classic works, which helped introduce the idea of "social constructionism" to sociology. Newman uses the metaphors of "architecture" and "construction," to help students understand that society is not something that exists "out there," independently of themselves; it is a human creation that is planned, maintained, or altered by individuals. Using vivid prose, current examples, and recent data, the Thirteenth Edition presents a unique and thought-provoking overview of how society is constructed and experienced. Instead of surveying every subfield in sociology, the more streamlined coverage (14 chapters) focuses on the individual and society, the construction of self and society, and social inequality in the context of social structures. Give your students the SAGE Edge! SAGE Edge offers a robust online environment featuring an impressive array of free tools and resources for review, study, and further exploration, keeping both instructors and students on the cutting edge of teaching and learning. The Drama of Social Life - T. R. Young -
2017-07-12

These essays explore the many ways theater and dramaturgy are used to shape the everyday experience of people in mass societies. Young argues that technologies combine with the world of art, music, and cinema to shape consciousness as a commodity and to fragment social relations in the market as well as in religion and politics. He sees the central problem of post-modern society as how to live in a world constructed by human beings without nihilism on the one hand or repressive dogmatism on the other. Young argues that in advanced monopoly capitalism, dramaturgy has replaced coercion as the management tool of choice for the control of consumers, workers, voters and state functionaries. Young calls this process the "colonization of desire." Desire is colonized by the use of dramaturgy, mass media, and the various forms of art in order to generate consumers, vesting desire in ownership and display rather than in interpersonal relationships with profound consequence for marriage, kinship, friendship and community. While Young focuses his critique on capitalist societies undergoing great changes, he insists that the same developments are to be found in bureaucratically organized socialist societies. The Drama of Social Life is of interest to those who study theories of moral development, cultural studies, the uses of leisure, politics, or simply the uses of "make believe." It is intended for the informed lay public as much as for social psychologists.

Sociology - David M. Newman - 2009-12-08
The Eighth edition of David Newman's Sociology: Exploring the Architecture of Everyday Life once again invites students into the world of sociological thought. Sociology encourages students to think less about the next test and more about how the subject applies to their everyday lives. In addition to updated coverage and fresh examples, this edition features revamped Micro-Macro Connections that have been even further honed to help students understand the link between individual lives and the structure of society.

The Senses in Self, Society, and Culture - Phillip Vannini - 2013-10-18
The Senses in Self, Society, and Culture is the definitive guide to the sociological and anthropological study of the senses. Vannini,

map of the social and cultural significance of the senses that is woven in a thorough analytical review of classical, recent, and emerging scholarship and grounded in original empirical data that deepens the review and analysis. By bridging cultural/qualitative sociology and cultural/humanistic anthropology, The Senses in Self, Society, and Culture explicitly blurs boundaries that are particularly weak in this field due to the ethnographic scope of much research. Serving both the sociological and anthropological constituencies at once means bridging ethnographic traditions, cultural foci, and socioecological approaches to embodiment and sensuousness. The Senses in Self, Society, and Culture is intended to be a milestone in the social sciences' somatic turn.
